Clinically Effective  
Superior Performance**

## Versus Leading Alcohol Sanitizers

The best way to compare alcohol-based instant hand sanitizers to GentleCare™ is by breaking down the applications per ounce, cost per application, and comparing features and benefits.

Note: GentleCare Foam is a measured application while alcohol product usage per application may vary with the user.

GentleCare™ Foam Skin Sanitizer 7.1oz Foam - 1 Pump Application	Prevacare by J&J 4 oz. Liquid - Nickel Size Application	Avaguard by 3M 3 oz. Liquid - Nickel Size Application
	Steris Cal Stat 4 oz. Liquid - Nickel Size Application	Purell by GoJo 4.25 oz. Gel - Nickel Size Application

### In addition to cost savings, GentleCare™ Instant Skin Sanitizer :

- ✓ Does NOT sting! - even when applied to chaffed hands
- ✓ Provides lasting protection after each use - alcohol stops working as soon as it evaporates
- ✓ Kills germs rapidly (99.9% reduction of gram-positive and gram-negative pathogens, including MRSA, E-Coli and VRE)
- ✓ Fragrance Free (no medicinal smell) to encourage use
- ✓ Retains efficacy for life of product - alcohol concentration declines over time as it evaporates and absorbs water. If alcohol concentration is not at least 60%, it is no longer considered antimicrobial.
